

# PULSAFEEDER®

The Pulsatron Series ET was designed to feed chemical in response to a water meter input. When the count exceeds a set value (either 1 or 10), the pump starts. The pump will continue to run for an adjustable time period. The Series ET includes both input and output water meter connections at the front panel. The output connection provides an isolated dry contact output of the water meter contact to operate additional pumps or timers off the same water meter. Typical applications include inhibitor feed for an open air-cooling tower. The Series ET provides everything you need in one unique, compact package to create a simple and cost effective metering system.

Fourteen distinct models are available, having pressure capabilities to 250 PSIG (17 BAR) @ 5 GPD (0.8 lph), and flow capacities to 504 GPD (79.5 lph) @ 20 PSIG (1.3 BAR), with a turndown ratios up to 100:1. Metering performance is reproducible to within  $\pm 2\%$  of maximum capacity.

## Features

- Complete Timer Control in one unique package.
- Simple 'Mode Select' knob, Stroke Length, Stroke Rate.
- Two Selectable Time Base Settings.
- Water Meter Input. Activate pump on 1 or 10 counts.
- Isolated Dry Contact Water Meter Output.
- Isolated from Earth Ground.

## Controls

### Manual Stroke Rate

- Turn-Down Ratio 100:1

### Manual Stroke Length

- Turn-Down Ratio 100:1

### Time Range

- 2 to 200 seconds or 12 seconds to 20 minutes

### Time Percent

- 1 to 100%

### Water Meter Input and Output

- Isolated dry contact

## Operating Benefits

- Reliable metering performance.
- Rated "hot" for continuous duty.
- Leak-free, sealless, liquid end.

## Aftermarket

- KOPkits
- Gauges
- Dampeners
- Pressure Relief Valves
- Tanks
- Pre-Engineered Systems
- Process Controllers (PULSAblue, MicroVision)

### Custom Engineered Designs – Pre-Engineered Systems

#### Pre-Engineered Systems

Pulsafeeder's Pre-Engineered Systems are designed to provide complete chemical feed solutions for all electronic metering applications. From stand alone simplex pH control applications to full-featured, redundant sodium hypochlorite disinfection metering, these rugged fabricated assemblies offer turn-key simplicity and industrial-grade durability. The UV-stabilized, high-grade HDPE frame offers maximum chemical compatibility and structural rigidity. Each system is factory assembled and hydrostatically tested prior to shipment.
