Re: Chemtrol Streamlines Socket Heat Fusion Equipment Rental Program

Effective Monday, December 5, 2016, Chemtrol made the following changes to the socket heat fusion equipment rental program. The revised list price sheet, CH-SFE-1115R, is available for download via NIBCO websites at [www.nibco.com](http://www.nibco.com) and [www.nibcopartner.com](http://www.nibcopartner.com).

Chemtrol is adding additional WIDOS 3511 socket heat fusion bench-mount machines to the rental fleet. The rental equipment includes everything needed to fuse by hand unit or bench unit Chemtrol® schedule 80 PVDF and polypropylene fittings and pipe in sizes ½" through 4".

Chemtrol will retire the last few remaining WIDOS 75 socket heat fusion bench-mount machines in the rental fleet and will not be adding more. These machines were used to fuse Chemtrol® schedule 80 PVDF and polypropylene fittings and pipe in sizes ½" through 2".

The monthly rental rate of all available socket heat fusion equipment will be \$1,300 per month (4 weeks). The rental period begins the day the machine is shipped from the Charlestown plant and ends the day the machine returns to the Charlestown plant. Customers are billed one month (4 weeks) rental rate in advance, and pro-rated the weekly rental rate of \$325/week if returned expeditiously. Customers agree to a month-to-month rental where the additional months will be charged upon return of the rental equipment.

If you have questions, please contact your NIBCO sales or customer service representative. Thank you for your continued support of NIBCO products.

Sincerely,

NIBCO INC.
