Drumand Vessel Mixers

2LV, 3HV AND 5HV

The all 316SS Jet Stream utilizes a stator and rotor combination for complete liquid mixing. All the liquid is pumped down by the rotor and through our patented stator. The material exits the stator in strong vertical lines to the bottom of the vessel. It is deflected sideways, passes up along the walls of the vessel guaranteeing a 100% homogenous mixture.

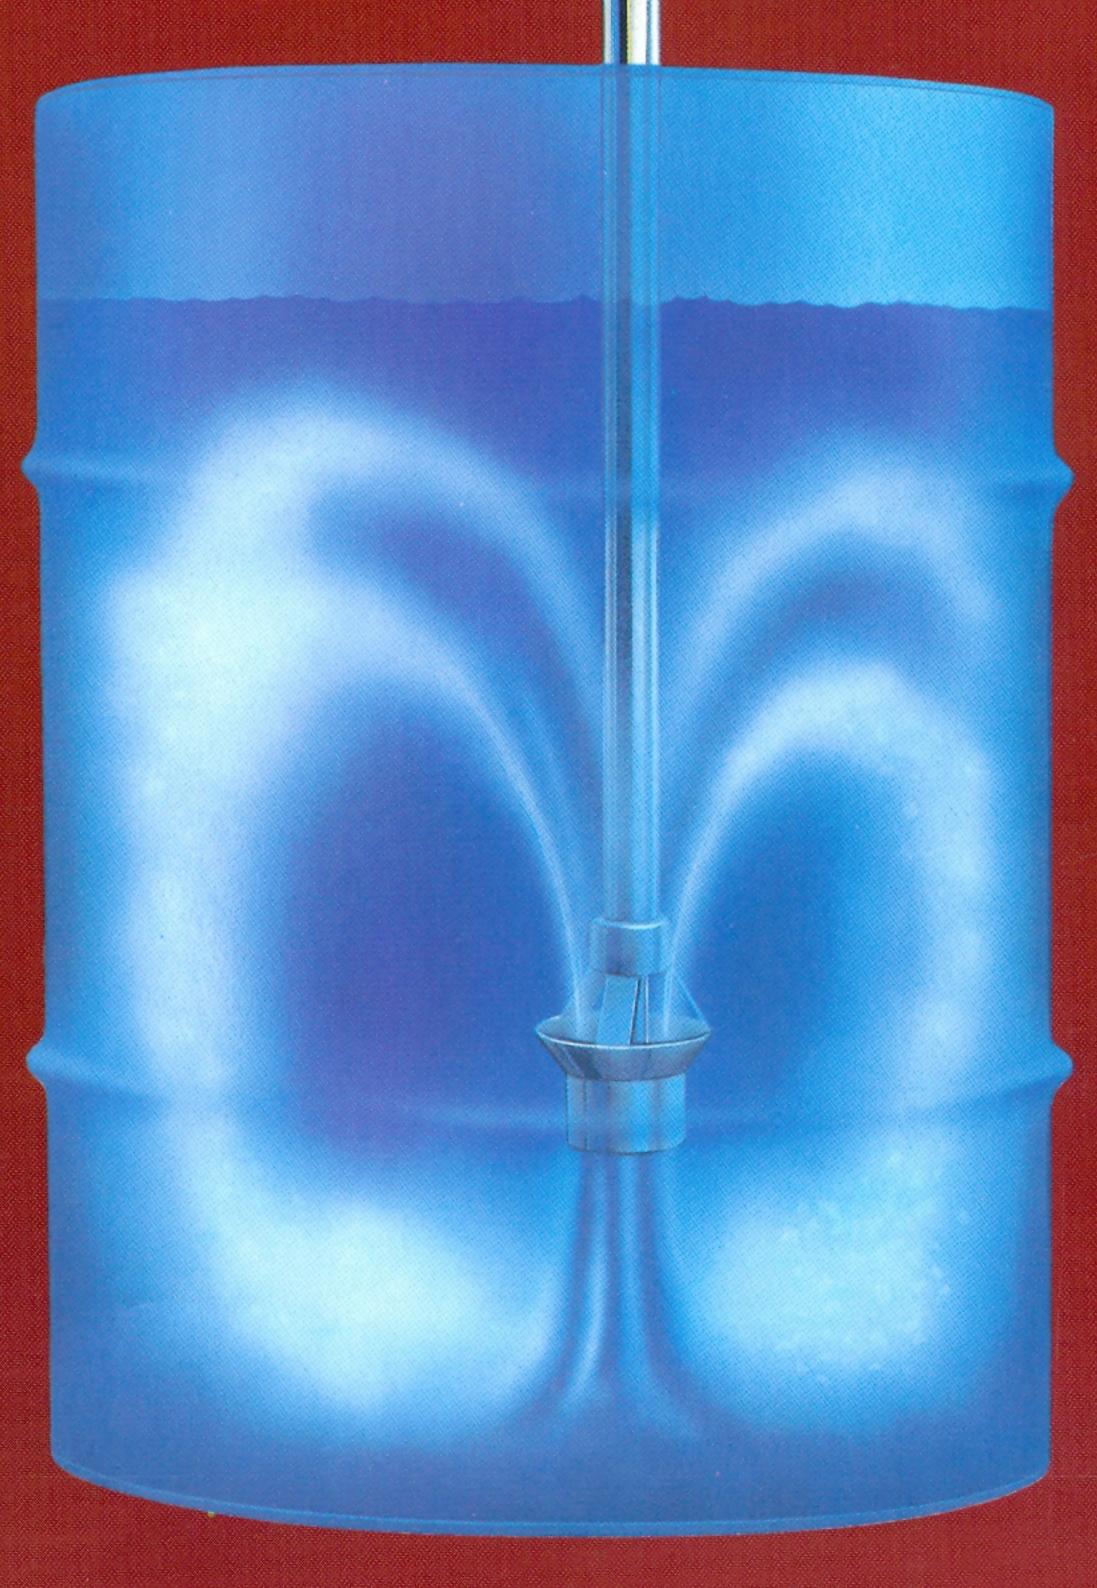

Jet-Stream Eliminates:

- Vortex
- Product Build-up
- Product Shear
- Sedimentation
- Problem With Drum Liners

Light powders are readily introduced by the mixers because the powders are pulled down into the stator and directed in a jet stream action to the bottom of the vessel.

Typical Applications:

- Food Processing
- Cosmetics
- Chemical Manufacturing
- Pharmaceuticals
- Paints
- Inks
- Waste Treatment

DRUM AND VESSEL MIXERS

The all 316SS Jet Stream utilizes a stator and rotor combination for complete liquid mixing. All the liquid is pumped down by the rotor and through our patented stator. The material exits the stator in strong vertical lines to the bottom of the vessel. It is deflected sideways, passes up along the walls of the vessel guaranteeing a 100% homogenous mixture.

Jet-Stream Eliminates:

Light powders are readily introduced by the mixers because the powders are pulled down into the stator and directed in a jet stream action to the bottom of the vessel.

Accessories:

Disperser Grid
Designed to break up
agglomerated materials
in the medium. For use
on 3HV mixers only.

Motor Mount Clamp

Fully adjustable and designed to clamp to side of drum or open vessel. Adaptor is available for air motors.

Open Tank Bracket

316SS construction for 55 gal. drum. Exclusive Polypropylene security lock prevents mixer from moving during operation.

The Selection Guide is to be used only as a guide in mixer selection.

available.

5HV Open Vessel

5" Diameter Stator

Electrical* 2HP — 115/230/1/60HZ Wt. 40 lbs. — EXP Add 10 lbs. Maximum Tank Size: 500 Gallons

Air Drive — Model 5 HVP 82 CFM 60 PSI Wt. 24 lbs.

Air drive requires air motor adapter for motor mount clamp.

*1 ft. & 2 ft. extensions are available.

^{*}Consult factory for other electrical motor requirements. Larger models available. \cdot
