Lutz—EASYZON Chlorine Dioxide Systems

(Lutz Jesco EASYZON ClO₂ System)

In water treatment, chlorine dioxide is an effective oxidant and used, among other applications, for combating Legionella and secondary disinfection.

Chlorine dioxide is characterized by a high disinfecting effect and is effective even at high pH values that render chlorination ineffective. The odor threshold is higher than that of chlorine, and chlorine dioxide features a higher lifetime in tap water, which makes it more appropriate for ramified pipe systems.

The EASYZON 15g/30g ClO₂

generators each provide a compact system for the on-site production of chlorine dioxide. The EASYZON ClO₂ generator produces chlorine dioxide from hydrochloric acid and sodium chlorite, reacting at a 1:1 ratio to reach a ClO₂ solution.

In short, the systems offer high efficient on-site—on-demand ClO₂ production; compact, pre-assembled unit; integrated monitoring of all functions; and built-in safety features. For complete details, download brochure at [Chlorine Dioxide System](#).

Industry Events

- WEFTEC (Water Environment Federation)
Chicago, IL
September 23-25, 2019
- Chem Show
New York, NY
October 22-24, 2019
- SGIA (Specialty Graphic Imaging Association)
Dallas, TX
October 23-25, 2019

Notes of Interest

- “Have I not commanded you? Be strong and courageous. Do not be afraid; do not be discouraged, for the Lord your God will be with you wherever you go.”
—Joshua 1:9
- “Golf is not a fair game, so why build a course fair?”
—Pete Dye

Company News

- Foust Marketing has an **OPEN** position for Technical Sales.

Harrison—Corzan® CPVC Qualified Fabricator

Harrison Machine & Plastic is recognized for inclusion in the Corzan® Key Industrial Fabricator Program in that they have completed a qualification process, whereby their welding processes meet established standards, which focus on weld strength (short term tensile strength), following the guidelines of ASTM C 1147.

Harrison fabricates round or rectangular Corzan® CPVC duct

system using your specifications. Harrison offers round Corzan® CPVC ductwork systems from 2" to 60", and rectangular or square CPVC duct from 6" x 8" up to 30" x 96".

Harrison Corzan® CPVC duct manufactured in OH, and SC, and inventory maintained in OH, SC, TX, and CA.

For more information, visit www.harrisonplastic.com.

NIBCO—Chemtrol Used for Corrosion Resistant Applications

Chemtrol flow-control products are unsurpassed in performance and longevity. With more than 60 years of experience in industrial thermoplastics, Chemtrol offers dependable products that work in the most demanding corrosive environments. The line of quality Chemtrol® pipe, fittings, and valves are lightweight, corrosion resistant, and maintenance-free – saving you time and money.

Great ideas flow from Chemtrol in PVC, CPVC, PP, and PVDF products for a wide range of flow-control applications. For specific recommendations of chemical compatibility, view the [Chem-Guide](#), and for engineering data related to plastic piping system design and installation, and maintenance instructions, view the [Chemtrol Thermoplastic Piping Technical Manual](#). Contact our sales team for additional product specifications or literature.

Pulsafeeder Skids Now Available in CPVC

Pulsafeeder is excited to announce that the Pre-Engineered Systems for BLACKLINE pumps are now available in CPVC!

With superior chemical compatibility and better temperature resistance the CPVC Pre-Engineered Systems is an extension of the current PES line. CPVC PES available with EPDM or Viton elastomers in single or dual pump configuration.

Continuing the “worry less, do more” philosophy, they reengi-

neered their approach to technical documentation for the Pre-Engineered Systems.

Applications

- **Municipal Water:** Disinfection systems Sodium Hypochlorite, pH Adjustment, Fluoride addition.
- **Municipal Wastewater:** Fume Scrubbers, General Odor Control, pH adjustment, Residual Disinfectant Management.
- **Food & Beverage:** Clean-In-Place, Clean-Off-Line, Sterilizer Water Treatment, Metal Process
- **Institutional:** Cooling Tower Water Treatment, Boiler Water Treatment, Closed Loop Systems

Pulsafeeder is confident the expanded PES line and simplified document structure will allow for a streamlined communication and quoting process for the customer.

The Blue Line—Win NCAA YETI Tumbler!

Foust Marketing is offering the opportunity to win a prize in this issue of [The Blue Line](#).

To celebrate the college football season, we are offering a NCAA YETI Tumbler of your favorite team courtesy of **Lutz** and Foust Marketing.

Enter by visiting our website with the correct answers.

1. How is chlorine dioxide more effective than chlorination?
2. To meet the Corzan Qualified Fabricator Program, Harrison's welding focused on what to meet ASTM C 1147?
3. Great ideas flow from what Chemtrol products for a wide range applications?
4. List a couple applications for the Pulsafeeder CPVC skids?

5. What did Pete Dye say about the game of golf?

Winners of the Personalized Louisville Slugger baseball bats from the last issue courtesy of **IPS Adhesives**.
