NIBCO—Chemtrol® Socket Fusion Tools

NIBCO piping systems are designed for the engineering and end-user community for corrosive applications. Chemtrol® piping systems are the choice for transporting high purity or corrosive fluids in the electronics, biotech, pharmaceutical and food processing industries,

and ideal for deionized water and processes requiring clean, non-leaching characteristics.

NIBCO offers a complete line of new and rental socket fusion tools for the fusion of Polypropylene and PVDF pipe, valves and fittings in sizes 1/2" thru 6" IPS. They offer five joining solutions from Hand Held to Benchmount units. All units are portable and available for PP and PVDF materials used for pressure or drainage systems handling aggressive and/or high temperature chemicals.

Product Kits

- MSJK Kit Hand Held 1/2" - 2"
- MSJK Kit Hand held 3" - 4"
- Model 75 Benchmount 1/2" - 2"
- Model 3500 Benchmount 1/2" - 4"
- Model 3600 Benchmount 4" - 6"

Foust Marketing has been a partner with NIBCO in the region for over 19 years. Our team offers socket fusion training for Chemtrol PP and PVDF systems.

See the video on how to join Chemtrol® PP and PVDF at: [Chemtrol Benchmount Tool](#).

Lutz—Explosion Proof Drum Pumps for Hazardous Liquids

Safe equipment is a must in hazardous locations. The explosion proof models of Lutz drum pumps provide optimum protection when handling flammable liquids, combustible material and when working in potentially explosive environments.

Required accessories for using explosion-proof pumps in hazardous locations: Explosion-proof plug and socket outlets, bonding and grounding cable,

conductive hoses and nozzles in Stainless Steel, and Ex-Motor (ME I, MD1xL, MD2xL).

Warning: When using in hazardous location or when pumping flammable or explosive liquids only pump tubes marked "Zone 0" are to be used. Such metal tubes are only Stainless steel and Hastelloy "C" tubes for more corrosive applications. For more product information, visit www.lutzpumps.com.

Caseway—SC-302 Bodied ABS Solvent Cement

Caseway SC-302 is a fast-drying, milky-bodied, solvent cement. SC-302 will give you a bond in a matter of minutes. The bond continues to become stronger over a matter of days. Materials joined with SC-302 will generally have the same rigidity or flexibility as prior to cementing. Caseway SC-302 is ideal for cementing ABS to ABS and dissimilar materials like PVC, Expanded PVC, Kydex®, and Vinyl.

The surfaces to be cemented with SC-302 should fit accurately without forcing. Butt joints should be true and matched. Edges should not be polished since polishing usually rounds corners and prevents the necessary square fit. Sanded or roughened surfaces will produce better bonds. For more detailed information on directions of use and cure-time, contact our sales team or download the flyer at [SC-302 Bodied ABS Solvent Cement](#).

IPS—Christy's Slick-Wrap® Pipe Repair Kit

Slick-Wrap™ is a specially formulated epoxy resin impregnated repair tape system and includes a piece of FastFix™ epoxy putty. Slickwrap™ can be used to seal leaks or cracks in virtually any type of piping system, including plastics, copper, metal, ductile, galvanized, fiberglass, and poly pipe. Slick-Wrap™ is an ideal repair system when conventional repairs or replacement are not feasible.

Slick-Wrap™ works by creating a fiberglass/resin epoxy pipe over the host piping material,

allowing for either a permanent or temporary repair at pressures up to 300PSI (with 8 wraps over the break). Slick-Wrap™ will cure under water. To guarantee the highest probability of success, we recommend following our directions closely. Multiple packages of Slick-Wrap™ can be used for larger applications or breaks. Slick-Wrap™ does not “shrink to tighten”. Slick-Wrap™ can be used in a wet environment and can be pressurized 45-60 minutes after application.

Christy Part Number - **PW260**
Up to 2" - 2" x 60"

Christy Part Number - **PW3108**
Up to 4" - 3" x 108"

The Blue Line—Win NCAA Tumbler!

Foust Marketing is offering the opportunity to win a prize in this issue of [The Blue Line](#).

This issue we are offering a **NCAA Tumbler** courtesy of Foust Marketing and NIBCO.

Enter by visiting below link with the answers to the questions.

1. What size range does NIBCO offer Hand Held and Socket Fusion tools?
2. What accessories are required for using Lutz explosion-proof pumps in hazardous locations?
3. What substrates is Caseway SC-302 Bodied ABS Solvent Cement ideal for bonding?
4. What is Christy's Slick-Wrap™ Pipe Repair Kit used for? Can multiple packages be used for

larger applications?

5. What did Dr. John Delony say about your bank statement, calendar and screen time?

Winner of the \$50 Pappas Gift Card from the last issue courtesy of King Plastic and Foust Marketing.
