SWM—Acetal Bushing Stock Available!

Acetal (polyoxymethylene) is an ideal choice for many industrial applications due to its mechanical properties. Acetal is a high-strength, low friction engineered plastic that has excellent wear properties in both wet and dry environments.

SWM offers (homopolymer) Acetal in natural color sold in 5' lengths (1/4" OD to 2 1/2" OD). The bushing stock has superior stiffness and toughness while providing a low friction surface for many applications including bushings and bearings as well as many other machinery parts.

Acetal is also used to produce products that are highly resistant to abrasion, heat, water absorption and organic chemical compounds (i.e. hydrocarbons) and spans the material properties gap between most

plastics and metals. It is used when you need a strong, slippery and/or flexible part for sliding mechanisms in automotive, medical, industrial and commercial applications.

Easy to machine to close tolerances, these dimensionally stable tubes resist expanding when exposed to heat and moisture. They have a naturally slippery surface along with excellent wear resistance.

For more information, contact our sales team for pricing or visit www.swmintl.com.

King Plastic—King KPC ABS Ideal for Machining Applications

The advantage of King KPC ABS is that this material combines strength and rigidity of the acrylonitrile and styrene polymers with the toughness of the polybutadiene rubber. A variety of

modifications have been made to improve impact resistance, toughness and heat resistance. The impact resistance does not fall off rapidly at low temperatures and stability under load is excellent with limited loads.

KPC ABS is considered superior for its hardness, gloss, toughness, and electrical insulation properties. KPC ABS is easily machinable and is available in smaller sizes.

King Plastic also offers King KPC ABS Black in a FR (flame retardant) formulation for use in applications such as transformer housings, switches, shelving, air conditioner components, and a white food grade formulation which is an outstanding material for professional food services. All King KPC ABS products are FDA approved with the exception of ABS-FR. For more details, visit www.kingplastic.com.

Christy's Expands Offerings with Red Hot Vinyl Adhesives

IPS Weld-On and Christy's leads the industry in the innovation and development of primers, cleaners, and solvent cements for PVC and CPVC. Christy's is pleased to launch a new line of vinyl construction adhesives that provide superior adhesion for PVC fencing, decks, sidings, windows, railings and more.

The Red Hot vinyl adhesives provide superior adhesion, strong weather-proof bond with UV protection. The product will not crack, yellow or discolor. Available in clear and white at your local IPS Weld-On and Christy's distributor. Christy's Red Hot is the fastest strongest setting vinyl adhesives. There is fast, and then there is Red Hot Fast. For more information, visit Christy's Red Hot Vinyl Adhesives.

Company News

- Foust Marketing offers a complete line of pipe beveling tools. Add the [PB-200](#) Cordless Power Beveller to your inventory!

Champion Fiberglass Bridge Drain™

The Champion Bridge Drain™ is a fiberglass product which enables the bridge drain system to be used in corrosive applications where steel and PVC drainage systems would traditionally fail. Champion Bridge Drain incorporates the highest-quality components to provide superior chemical, UV and fire resistance. Champion Bridge Drain can resist pollutants typically seen in water run-off as well as environmental and climatic stresses.

Features

- **Lightweight** – Champion Fiberglass Bridge Drain features a weight that's up to 1/5 that of comparably sized steel conduit.
- **Lower installation costs** – In addition to lower material costs, Champion Bridge Drain features lower installation costs.
- **Excellent temperature range** – Champion Bridge Drain has an excellent wide temperature range (-60° to +250°).
- **Easier field handling** – Due to its light weight, ease of cutting and integral bell, Champion Bridge Drain is easier to install.
- **High-impact resistance/memory retention** – Excellent memory retention, with ability to return to original shape after impact.

The Blue Line—Win Wyze Scale!

Foust Marketing is offering the opportunity to win a prize in this issue of [The Blue Line](#).

This issue we are offering an **Wyze Scale for Smartphone** courtesy of Foust Marketing and SWM.

Enter by visiting below link with the answers to the questions.

1. What does SWM offer Acetal Bushing stock in?
2. Why is King KPC ABS considered superior in the industry?
3. What are some of the applications for the new Christy's Red Hot vinyl adhesives?
4. Where does the Champion Bridge Drain product enable a bridge drain system to be in?

5. What did Will Ferrell say about getting married?

Winner of Tupelo Honey from the last issue courtesy of IPS Weld-On and Foust Marketing.
