King Plastic—Medical Carts Made with King StarBoard® ST

For over 25 years, TrippNT has been manufacturing medical equipment and organizers for establishments such as: Johns

Hopkins, Northshore Hospital, North Kansas City Hospital, and UF Health Shands Hospital, and many more. TrippNT exclusively uses King StarBoard® ST for its high-quality sheets, tight tolerances, and superior flatness and consistency. The polymer sheet is durable, corrosion resistant, and capable of withstanding heavy repeated use while supporting heavy weight loads. King StarBoard® ST stands up to the harsh chemicals used in frequent sanitation, making it a vital material for the medical environment.

TrippNT manufactures medical carts for scientific and medical markets made with King StarBoard® ST, the polymer building sheet that lasts a lifetime.

King StarBoard® ST is a unique and advanced, high-density polyethylene building sheet that lasts a lifetime. The polymer sheet is 25% stiffer than the original King StarBoard®. It is a product of a proprietary process called K-Stran™, the most advanced manufacturing process for superior flatness and consistency.

Foust Marketing Celebrates 20 Years with Harrison Machine & Plastic

Foust Marketing has started our 21st year in business as a manufacturers' representative. We have been fortunate to represent many quality manufacturers over the years. During the year we will be featuring a few manufacturers that have been partnered with us for 20 years.

The Foust Marketing team celebrates their 20th year partnership with Harrison Machine & Plastic. Harrison is a first class

company and we appreciate representing Harrison. The team at Harrison is focused on quality products and service. Our success over the years with Harrison is due to the Harrison team, distribution partners, and specifications for their product.

Harrison has become the leading manufacturer of PVC and CPVC pipe duct and fittings, and custom fabricated parts. We would like say Thank You to

Harrison and our customers that have supported us over the years. We appreciate all the success and look forward to a great future.

King Plastic—New Customer Service Manager

Left to right: Heather Skraba, Katy Gruber, Michelle Mullin, and Chris Gantt.

King Plastic is pleased to introduce Michelle Mullin as their new Customer Service Manager. Michelle's interpersonal skills bring a great attitude and dedication to providing excellent service. She will continue the long-standing tradition of excellent customer service that King Plastic customers have come to expect. Michelle fills the role left open by their long-time leader Maggie Lenard. Maggie retired earlier this year and plans on spending more time with her grandchildren and doing some things on her bucket list. We wish her the best in her retirement. Michelle has the support of the entire King Plastic sales team, including her excellent customer service team (Pictured left). Please contact her and welcome Michelle to the King Plastic team.

IPS Weld-On® 711 ECO™

Weld-On® introduced the ECO Series of ultra low VOC solvent cements and primers for industrial, pool and spa applications. The ECO Series' proprietary formula achieves strong bond strength in plastic pipe joints just like Weld-On's current cements but with 30% lower solvent emissions and odor.

Weld-On® 711ECO™ is a code compliant, premium THF-free cement with 30% lower solvent emission rate and significantly reduced odorous fumes than the current solvent cements in the market – resulting in an improved workplace environment for pipe installers.

The 711 ECO is a gray, ultra low VOC, heavy bodied, medium setting, maximum strength PVC cement, with great gap filling properties, for all classes and schedules with interference fit, including Schedule 80 through 12" (315 mm) diameter. Suitable for potable water pressure systems, irrigation, turf, foam core, conduit, industrial pipe applications, sewer, drain, waste and vent systems.
