## DICE™ Dosing Module—How to Install a Pulsation Dampener

The DICE™ DS and DM Dosing Modules integrates all the necessary discharge components required for a typical chemical dosing system. The block type

design allows for a rigid, compact and reliable product. The significantly reduced number of connections is a major benefit as it greatly decreases leaks.

The DICE™ Dosing Modules are equipped with three ports on the side. They can be used for secondary pumps or for additional accessories such as a pulsation dampener, pressure transmitter, and more. The two lower ports are before the back pressure valve and the top port is after the back pressure valve.

When working with the DICE™

Dosing Module, always make there is no pressure or residual chemical inside the module. Always wear the required personal protective equipment and refer to the DICE DS and DM Installation and Operation Manual for more information.

In the below video link, they will be showing how simple you can integrate a pulsation dampener in the DICE™ Dosing Module. [www.meuniertechnologies.com/en/pulsation-dampener-install/](http://www.meuniertechnologies.com/en/pulsation-dampener-install/)

## Notes of Interest

- “But I tell you, love your enemies and pray for those who persecute you.”  
—Matthew 5:44
- “Motivation is simple. You eliminate those who are not motivated.”  
—Lou Holtz

## Company News

- Foust Marketing offers a complete line of chemical feed equipment from DICE Dosing Modules, Pre-Engineered skids, metering pumps, controllers, and accessories.

## Lutz-Jesco—Centrifugal Chemical Pump

Centrifugal chemical pumps are used for pumping acid and alkalis and other low-viscosity, aggressive liquids and neutral media. The MB motor pump

from Lutz-Jesco is a single-stage, normal-priming centrifugal pump in block design with horizontal axis. The MB pump has an open impeller for low-viscosity, acid and alkaline solutions with low solid matter content. The pump head assembly consists of high-quality plastic materials with hydraulically efficient spiral casing.

Mechanical seals basically consist of two perfectly plane sur-

faces. One surface rotates with the shaft, while the other is stationary. The sealing effect is achieved by the direct contact between the two plane surfaces. The sliding ring is able to move axially and radially in order to compensate the shaft deflections during operation. This axial mobility enables mechanical seals to be fitted within practicable manufacturing tolerances, the accuracy being dependent on the design of the seal.

## Griffco Valve—Every Accessory for Fluid Handling

proudly made in the USA. Griffco Valve offers: Back Pressure Valves, Pressure Relief Valves, Calibration Columns, Chemical Injection Valves, Gauge & Instrument Guards, Corporation Stops, Pulsation Dampeners, Fusion Dampeners, Y-Strainers, and other Accessories. For details, visit [www.griffcovalve.com](http://www.griffcovalve.com).

Griffco Valve manufactures reliable, high-quality pump accessories for chemical feed and pumping systems. Established in 1992, Griffco products are used for municipal, industrial, and processing applications worldwide and are backed by a network of distributors and channel partners to help meet your needs. Pump companies understand and trust Griffco to be the best in class and deliver with our “Quick Turnaround Advantage” program. Our products are

## IPS Weld-On® 737 Turf 'N Ag

IPS Weld-On® 737 Turf 'N Ag is a medium bodied, very fast setting, low VOC PVC cement for all classes with interference fit Schedule 40 through 8" diameter, Schedule 80 through 4" diameter. This high quality blue (fades to clear in sunlight) cement has a slightly higher viscosity making it ideal for turf and agricultural applications and excellent for PVC Well casing. Works well in wet condi-

tions and/or quick pressurization. Can be used without primer on non-pressure systems if local codes permit.

Although developed to answer specific requirements of the irrigation and agriculture markets, it is also suitable for use in plumbing and other applications.

Detailed directions on making solvent cemented joints are printed on the container label. Installation training covering solvent cementing is available. It not only describes the basic principles of solvent cementing, but also covers the handling, storage and use of our products. It is highly recommended that the installer review the instructions supplied by the pipe and fitting manufacturer.

## The Blue Line—Win NCAA Golf Shirt!

Foust Marketing is offering the opportunity to win a prize in this issue of [The Blue Line](#).

With the college football season getting close, we are offering **NCAA golf shirt** for your favorite team courtesy of Meunier Technologies and Foust Marketing.

Enter by visiting below link with the answers to the questions.

1. What can the three ports on the side of the DICE Dosing Module be used for?
2. What type of impeller does the MB Motor Pump from Lutz-Jesco have?
3. List a couple accessory products offered by Griffco Valve?
4. What Schedule 80 diameters can Weld-On® 737 be used?

5. What did Lou Holtz say about motivation?

Winners of the personalized Louisville Slugger bats courtesy of NIBCO and Foust Marketing.

**Pat Roller**  
Boedeker Plastics—Shiner, TX

**Greg Roth**  
Cope Plastics—Hazelwood, MO

**Sally Carlson**  
Cope Plastics—Topeka, KS
