MARCH Pumpen Mag Drive Gear Pumps

Foust Marketing is excited to announce the latest addition of MARCH Pumpen to our chemical metering pump products.

MARCH Series TEF-MAG® gear pumps are corrosion and chemical resistant, non-metallic, rotating positive displacement

pumps, external gear type and magnetically coupled. TEF-MAG® gear pumps generate low volumetric flows with middle to high discharge pressures and approximately no pulsation.

- TEF-MAG 25**
– 7.93 GPH @ 290 PSI
- TEF-MAG 201**
– 87.8 GPH @232 PSI
- TEF-800**
– 225 GPH @ 362.5 PSI
- TEF-1500**
– 435.88 GPH @ 232 PSI
- TEF-MAG 3500**
– 1228 GPH @ 232 PSI

The TEF-MAG 25 pump housing is made of chemical resistant PPS. The internal hydraulic parts like gears and shafts are also made of highly corrosion resistant non-metallic materials. The containment can is made of titanium sheet metal.

The power transmission of drive and pump happens in a contactless way with ferrite permanent magnets. So the pump is able to work without any mechanical shaft seals, which guarantees without any leakage of corrosive, toxic and harmful fluids.

- “As I grow older I pay less attention to what men say. I just watch what they do.”
—Andrew Carnegie

Company News

- Foust Marketing now offering a complete line of chemical feed equipment from skids, pumps, controllers, and accessories.

King Plastic—Architect and Designer Resource Center

Did you know!

Architects, Designers, and Spec Reps can now request literature and samples for specifying King Plastic materials. They have the option to select King Plastic

brochures and catalogs, case studies, target market flyers, and samples.

Brochures and Catalogs

- King Plastic 3-Part Specification
- Product Catalog
- King DuraStyle® Custom Cabinet Door Program Catalog (Made with King StarBoard® ST or King StarBoard® WG)

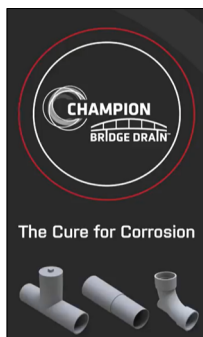

Case Studies available for applications using King StarBoard®,

King StarBoard® ST, King Medi-Grade®, King StarLite® XL, King ColorBoard®, and King ColorCore®.

Target Market Flyers available for Aquatics, Retail & Commercial, Outdoor Kitchens and Furniture, Pet Day Care, and Parks & Recreation Signs.

Champion Bridge Drain™—The Cure for Corrosion

Learn how Champion Bridge Drain™ benefits roadway bridge and highway overpass projects with corrosion resistance. Mechanical engineers and contractors know the importance of proper drainage for transportation projects such as bridges, as accumulated water can have disastrous effects in these environments. They also appreciate quality products able to withstand harsh outdoor environments.

Manufactured for extreme durability, Champion Bridge Drain™ is a versatile, high-strength fiberglass bridge drainage system used for highly corrosive drainage applications such as roadway bridges, highway overpasses and parking garages. With a shorter lead time and lower labor cost, molded bridge drain elbow fittings and BIM/Revit compatibility add to the reasons to consider Champion Bridge Drain for your next project. Download the flyer at [Champion Bridge Drain](#).

Lutz Hastelloy C Pump Tube

The Lutz Hastelloy C Pump Tube is designed for extremely corrosive applications. This robust Lutz pump tube is suitable for pumping nearly all kinds of liquids, whether extremely aggressive or flammable, clean or dirty, thin-bodied or slightly viscous out of drums and small or large containers.

Lutz pump tubes are immersible centrifugal pumps. The drive

shaft of this pump is not sealed. The bearing housing insert above the impeller is designed to prevent the pumped liquid from rising between the shaft and the inner tube. This insert guides the liquid which penetrates between the drive shaft and the shaft bearing back into the container being drained.

Lengths

- 39", 47", Special length on request.

Explosion Proof

- The pump tube is "Zone 0" approved in combination with the Lutz motors ME I, MD1xL, MD2xL in accordance with standards for use in hazardous locations.

Win \$50 Vineyard Vines Gift Card!

Foust Marketing is offering the opportunity to win a prize in this issue of [The Blue Line](#).

This issue we are offering a \$50 Vineyard Vines Gift Card courtesy of Foust Marketing.

Enter by visiting below link with the answers to the questions.

1. What are the internal hydraulic parts like gears and shafts made of in the TEF-MAG gear pumps?
2. With the new Architect and Design Resource Center from King Plastics, what area some of the options they can select?
3. How can Champion Bridge Drain™ help with the importance of proper drainage for transportation projects?
4. What applications is the Lutz Hastelloy C Pump Tube designed to handle?
5. What did Andrew Carnegie say about growing older?
