## Lutz-Jesco—MAGDOS LB Degassing Head Chemical Metering Pump

The Lutz-Jesco dosing head ventilation V stands for trouble-free dosing of outgassing chemicals and oxidizers like bromine, sodium hypochlorite (bleach), hydrogen peroxide, and more. An automatic vent valve sepa-

rates incoming gases that might cause loss of prime, thus enabling the pump to become self-priming in critical applications.

The dosing head ventilation is fitted with three connection valves. A part of the stroke volume and gas bubbles are returned to the tank during the pressure stroke via the upper vent valve (marked with an arrow). This permits re-aspersion of the pump, even given back pressure.

The dosing head ventilation is

fitted with an installation clip to secure the return hose.

In contrast to conventional pressure valves, the spring-loaded pressure valve is located in the center. An optionally-available angle connection prevents kinking of the pressure hose. The chemical head of the pump is made from chemically resistant PMMA (Acrylic) and machined to the tightest tolerances.

For more information, download the complete product flyer at [MAGDOS LB Degas Head Pump](#).

## Club Pacifica Outdoor Sign Made with King StarBoard® ST

The luxury homes at Pacifica San Juan represent Southern California living at its best with desirable locations that are just a short drive from the ocean. Pacifica San Juan features a

rare blend of quiet serenity, sense of community and luxurious coastal living. The entire master plan community will include gardens, lookouts, open space and both multi-use and equestrian trails.

The Club Pacifica outdoor sign is produced from one 48" x 96" sheet of black, 3/4" gauge King StarBoard® ST. The two-piece channel is fastened together and embedded into the con-

crete ledge. Letters and LED lighting are recessed into the channel for a sleek installation.

King StarBoard® ST was ideal for the outdoor letters because the sheets never need painting or refinishing. The sheet has a matte gloss finish and is environmentally stabilized to withstand the harshest outdoor conditions. It will not rust, delaminate or rot when exposed to UV, humidity or water.

## Notes of Interest

- "Therefore do not be anxious about tomorrow, tomorrow will be anxious for itself. Sufficient for the day is its own trouble."  
—Matthew 6:34
- "Worry does not empty tomorrow of its sorrow. It empties today of its strength."  
—Corrie Ten Boom

## Company News

- Come visit NIBCO (Chemtrol), Champion Strut™, Lutz-Jesco chemical metering pumps and skid systems, and DICE Dosing Module at the Texas Water Show this April in Fort Worth.

## Griffco Valve—Gauge & Instrument Guards

Griffco Valve diaphragm gauge guards and instrument isolators are designed to enhance the performance of chemical feed systems. The addition of gauges to the system ensure optimal pressures are maintained. Griffco diaphragm isolators protect instruments against chemical attack.

- ✓ Reliable Instrument Protection
- ✓ Will perform in any position
- ✓ Multiple Diaphragm Options
- ✓ No Metal Fasteners

Instrument Gauge Guards features include: Molded Noryl Top, 316 SS Gauge Connection, Calibration Screw for Zeroing, Available with or without Gauge. For details, visit [Griffco Instrument Gauge Guards](#).

## Harrison—Expert Plastic Fabrication

and components. Their team provides complete material take-offs per customer drawings. Round and rectangular duct pipe and fittings made to SMACNA specifications. Harrison can fabricate nearly any size or shape fitting. With over 40 years of experience, they know what works.

### Reduce Installation Costs

Harrison can pre-build large sections of your PVC duct fume exhaust system to reduce your installation costs. Flanged, socket, and plain-end sections available. Support your Harrison SUPERDUCT® fume exhaust system with Harrison's custom PVC duct support brackets. For complete specifications or product dimensions, visit [www.harrisonplastic.com](http://www.harrisonplastic.com).

Harrison SUPERDUCT® systems are fabricated to your specifications. Harrison SUPERDUCT® is offered from 2" to 60" in PVC, CPVC, PP and PVDF materials. Complete piping and fittings systems are available for air and pollution control systems.

### The Harrison Advantage

Harrison's expert team of qualified welders provide the highest quality fabricated plastic fittings

## The Blue Line—Win Tiff's Treats Cookies!

Foust Marketing is offering the opportunity to win a prize in this issue of [The Blue Line](#).

We are offering an order of the delicious **Tiff's Treat Cookies** for your sales team courtesy of Lutz-Jesco and Foust Marketing.

Enter by visiting below link with the answers to the questions.

1. What type of chemicals is the Lutz-Jesco Degassing Head pump designed for?
2. What made King StarBoard® ST ideal for the Club Pacifica outdoor letters?
3. With the addition of Griffco Valve gauges and diaphragm isolators protect instruments against?
4. What is the Harrison advantage

when it comes to expert plastic fabrication?

5. What did Corrie Ten Boom say about tomorrow's worries?

Winner of the \$50 DoorDash Gift Card courtesy of Thermoval and Foust Marketing.
