NIBCO—Chemtrol® Ideal for Wastewater Systems

Tough wastewater environments require the utmost reliability in flow control processes. Chemtrol® thermoplastic valves and fittings are designed to

handle the most aggressive media. Chemtrol® PVC, CPVC (Corzan®), Polypropylene, and PVDF (Kynar®) are ideal for processes such as typical wastewater systems including neutralization, solid waste removal, VOC removal, and more. Chemtrol® flow control products resist corrosion and chemical attack by acids, alkalis, salt solutions, and a wide range of other chemicals.

Through manufacturing processes, raw materials are transformed into countless products

for commercial, industrial, and consumer use—products that enhance, and often sustain, our lives. But these same processes also generate a product for which there is no demand: wastewater.

Industrial wastewater, laden with chemicals, toxins, and pollutants, must be treated properly before it is discharged to the environment or to a municipal wastewater treatment facility.

For more details, contact our team or visit www.chemtrol.com.

Company News

- Come see NIBCO (Chemtrol), Champion Strut™, Lutz-Jesco, and DICE Dosing Module at the Texas Water Show in Fort Worth.

Lutz-Jesco—MEMDOS 56C Pump Used for Municipal Applications

The MEMDOS LB 56C offers large coverage in terms of performance and chemical re-

sistance, thanks to a wide range of dosing head materials (PVC, PP, PVDF, SS).

The pump performance ranges from 0 to 324 gph. The maximum permitted pressure, depending on the size, is between 58 and 232 psig. Thanks to the sturdy tappet drive with manual or automatic capacity adjustment, the Chemtrol® thermoplastic valves and fittings such as acids, sodium hypochlorite,

coagulants and flocculants are dosed reliably and precisely. To adapt the dosing capacity, either the stroke length can be adjusted mechanically or the speed of the three-phase motor can be regulated by means of a separate frequency converter. On request, the MEMDOS LB pumps can also be supplied with a double-diaphragm system.

Champion Strut™ Benefits Projects with Corrosion Resistance

Wastewater treatment plants are challenging environments. They are subject to wet conditions, harsh chemicals and outdoor elements like sunlight that can deteriorate structures. These are exactly the applications that Champion Strut™ is made for. Corrosion resistance is a key consideration for piping support systems in harsh environments. In these applications, nonmetallic Champion Strut™ offers reliable, durable support to stabilize piping systems.

Available in Polyester and Vinyl Ester Resins, Champion Strut™ offers superior mechanical strength, UV and Fire Resistance. Champion Strut™ products are in-stock and available for same or next day shipment from TX. Learn more about corrosion-resistant support at [The Champion Strut Corrosion Solution](#).

New Improved Lutz PVDF Pump Tube

Cost Reduced and Improved!

Ideal for highly corrosive Acids and Base Solutions, e.g. Sulfuric Acid, Nitric Acid, Hydrofluoric Acid and Sodium Hypochlorite.

Lutz has the drum pump suited to any liquid to be pumped without compromise. Acids and alkalis have no impact on PVDF drum pumps. Lutz PVDF drum pumps are the perfect solution for transferring critical fluids

and acids. If you need to transfer acids from a drum or container, then Lutz PVDF drum pumps are ideal for easy transfer of the acids.

- Available Immersion Depths:
Item: 0122-201
 MSL-PVDF 41 R HC in 39"
Item: 0122-205
 MSL-PVDF 41 L HC in 39"
Item: 0122-202
 MSL-PVDF 41 R HC in 47"
Item: 0122-206
 MSL-PVDF 41 L HC in 47"
- Recommended with electric motor B55T-5 or Md2xL compressed air motor.
- Also available with Flow Meters and complete Drum Pump Set.
- Pricing has been reduced and competitive with CPVC tubes for sodium hypochlorite.

The Blue Line—Win Ugly Stick GX2 Combo!

Foust Marketing is offering the opportunity to win a prize in this issue of [The Blue Line](#).

We are offering an **Ugly Stick GX2 Fishing Rod and Reel** courtesy of NIBCO (Chemtrol®) and Foust Marketing.

Enter by visiting below link with the answers to the questions.

1. What industrial wastewater systems are ideal for Chemtrol® thermoplastic valves and fittings?
2. What chemical media can be conveyed safely with the MEMDOS LB 56C pump from Lutz-Jesco?
3. How does Champion Strut™ benefit challenging wastewater environments?
4. With the reduced pricing of the Lutz PVDF Pump Tube, what other plastic is it now competitive with on pricing?
5. What did a Mark Twain say about the weather in Spring?

Winner of the Tiff's Treats Cookies from the last issue courtesy Lutz-Jesco and Foust Marketing.
