Jesco PERIDOS Series Peristaltic Pump

Designed to meet the demanding requirements of chemical injection and dispensing applications. Exceptional self-priming capabilities make the PERIDOS Series an ideal choice for hard-to-handle chemicals such as sodium hypochlorite, hydrogen peroxide or viscous polymers. An extremely wide range of flow outputs can be obtained by simply changing the tubing size.

One size pump head accepts five standard tubing sizes. The spring loaded pump head rollers provide extended tubing life and automatically compensate for minor variations in pump tube wall thickness.

The PERIDOS Series pump system allows you to mount the controller on the wall...away from the harsh environment.

An optional tubing rupture detector will automatically shut down the PERIDOS pump and signal an alarm in the event of a tubing leak. Used in conjunction with the unique PERIDOS sealed pump design the Lutz-Jesco Tubing Rupture Detector helps to protect operators and other equipment from potentially dangerous fumes and chemicals.

Company News

- Foust Marketing offers a complete line of chemical feed equipment from pumps, skids, controllers, and accessories.

Lutz—PVDF Drum Pump for Chemical Transfer

Lutz has the drum pump suited to any liquid to be pumped without compromise. Acids and

alkalis have no impact on PVDF drum pumps. Stainless steel is particularly suitable for corrosive and neutral liquids, it proves especially useful in the pharmaceutical and food industry. Hastelloy C, which is extremely resistant, does not stop at highly aggressive acids or alkalis.

Lutz PVDF drum pumps are the perfect solution for transferring critical fluids and acids. If you

need to transfer acids from a drum or container, then Lutz PVDF drum pumps are ideal for easy transfer of the acids.

The Lutz PVDF drum pump is suitable for corrosive, aqueous to slightly viscous fluids. Perfectly suited for withdrawing or transferring concentrated acids and alkalis like chloric acid, chromic acid, sulfuric acid, nitric acid, hydrofluoric acid and sodium hypochlorite.

NIBCO—Chemtrol® Model D True Union Ball Valve

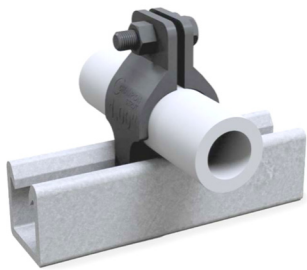

NIBCO offers the Chemtrol® Model D True Union Ball Valve through 2” port sizes for PVC and CPVC. The True Union Valve combines the best design features of the top-selling Model C with an increased 250 psi rating that now leads the industry.

Additional enhancements include: 250 psi rating at 73F—the highest in the industry; New ergonomic handle with built in carrier wrench; Double O-Ring, blow-out proof stem; Same face-to-face length of the Model C valve; NSF 61 approved • TruBloc Design; Rated for full vacuum service. Materials of construction include

heavy-duty EPDM and FKM O-Ring seals for stem, seat carrier and end piece. Model C Ball Valve still available for larger sizes and PP and PVDF valves. Please contact us for specifications for valves.

Champion Strut™ Rigid Pipe Clamps

For long-lasting project performance, Champion Strut™ is a complete system of fiberglass channel and non-metallic components. These components include fittings, threaded rods, pipe clamps, fasteners, nuts, pipe and conduit hanger types, pipe hanging accessories.

Champion Strut™ has been successfully used in many highly corrosive applications including steel mills, wastewater

treatment, utilities, refineries, chemical plants, marinas, pulp and paper, water reclamation facilities, theme parks, aquariums, pools and underground vaults.

Champion Strut™ rigid pipe clamps are made from glass-reinforced polyurethane and available in 1/2" - 8" nominal pipe sizes. Champion pipe clamps are IPS sized to fit the OD (outside diameter) of Schedule 40 and Schedule 80 PVC piping and conduit as well as IPS sized steel piping and steel/fiberglass conduits.

The Champion Strut™ rigid pipe clamps are designed to be used within (and not to exceed) operating temperatures up to 160°F. Contact our sales team for more information.

The Blue Line—Win RTIC Cooler!

Foust Marketing is offering the opportunity to win a prize in this issue of [The Blue Line](#).

We are offering a RTIC Ultra-Light 32 Quart Hard Cooler courtesy of Lutz-Jesco and Foust Marketing.

Enter by visiting below link with the answers to the questions.

1. How can you you achieve the wide range of flow outputs with the Jesco PERDIDOS Series Peristaltic Pump?
2. What are the Lutz PVDF drum pumps the perfect solution for transferring?
3. What seal materials are available with the Chemtrol® Model D Ball Valve?
4. What are the Champion Strut™

rigid pipe clamps are made of and what pipe sizes are they available?

5. What did Matt Baker say about where we are?

Congrats to the winner of the King Plastic Polo Shirt courtesy of King Plastic and Foust Marketing.
